

Evacusafe EvacBCOT

Every minute matters when it comes to saving lives.

That's why companies are turning to quick-to-deploy, life-saving equipment like the EvacBCOT.

EvacBCOT, an infant sized evacuation carrier, allows the wearer to be free and use of both of their hands during an evacuation. Easy to deploy and use, EvacBCOT is especially useful in a NICU or Nursery where several children may need to be evacuated quickly. EvacBCOT is light-weight, easy to wear, and works effectively in narrow corridors and staircases and on fire escapes since the user maintains use of both hands.

With comfortable, thick padding and an under-mount pocket for a CD oxygen cylinder, it provides a secure enclosure and makes it easy to move those precious little ones to safety.

EvacBCOT Specifications

Length (packed/deployed)	28"/24"
Width (packed/deployed)	14"/12"
Depth (packed/deployed)	4"/14"
