

Evacusafe EvacPRO

Every minute matters when it comes to saving lives.

That's why companies are turning to quick-to-deploy, life-saving equipment like the EvacPRO.

EvacPRO is an ultra-strong evacuation pad, safety-tested to over 880lbs. It is ergonomically designed to help the operator slide a heavier person across the floor during an evacuation allowing both you and the patient get to safety quickly.

Best for use in units that commonly treat overweight individuals, the EvacPRO rolls up for convenient, compact storage and comes with 6 color-coded straps to keep the patient safely in place. There are several pulling/maneuvering straps to help the operator move effectively and is made with durable, flame-retardant, wipe-clean material for infection reduction.

EvacPRO Specifications

Length (packed/deployed)	22"/82"
