

Evacusafe Evacuslider Plus

Every minute matters when it comes to saving lives.

That's why companies are turning to quick-to-deploy, life-saving equipment like the Premium Adjustable Evacuslider.

Evacuslider, a modern patient rescue sheet, quickly and effortlessly 'slides' people to safety during an evacuation. Easy to deploy and use, Evacusliders are especially useful where a non-ambulant person needs to be removed from a multi-story building. Evacusliders are nimble, working effectively in narrow corridors and staircases and on fire escapes. With a comfortable, thick foam mattress with a super smooth underside, it is easy to move those needing to be transported horizontally.

The Premium Adjustable Evacuslider is a comfortable, fully adjustable and flexible answer for securing people of varying heights and sizes.
